Assignment 6 - Document Structure

TW Lab 2025

Write TEX code to output the following sections. Also follow any instructions provided in the document. Use TEX reference and appropriate packages wherever required.

A Fonts and background

Try to match the page background color. Then create the following trivlist:

This text is written in DejaVu Serif, the main font.

This text is written in DejaVu Sans, the sans-serif font.

`This text is written in Courier, the monospace font.`

Use the package fontspec and make sure that you configure TeXstudio to use XeLaTeX as the default compiler.

B Spacing

This is the first line of a paragraph.
This is another line, but not another paragraph.

This paragraph starts 1cm below. Now, observe both the paragraphs given below and how they differ in hyphenation:

This is another paragraph. Incomprehensibilities and antidisestablishmentarianisms are two long words.

This is another paragraph. Incomprehensibilities and antidisestablishmentarianisms are two long words.

Recreate the paragraphs above and then continue from next page, leaving space for section C.

D Numbering

Ensure that all sections are numbered using alphabets.

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1 \tag{1}$$

$$x^2 + y^2 = 1 \tag{2}$$

Equation 2 denotes a circle. Now add the equation of an ellipse before the equation of the circle.

E Boxes and Lines

This message is written in a savebox.

This message is written in a savebox.

This message is written in a savebox.

This message is wrapped in a 5cm paragraph box.

Note that these boxes are used for highlighting and layout design. Create an index of some relevant terms from this document. Also add the bibliography [2] as shown in the following pages. Add the missing entry to the Latex-in-short book [1], in the bib file attached and cite it appropriately. Carefully understand how index file and bib files are compiled.

Index

background, 1

numbering, 2

savebox, 2
